

MULTI - VOLTAGE DC DIMMER 12V 200W / 24V 100W

The MULTI VOLTAGE DIMMER has been designed specifically for the Marine Environment and works as an intelligent easy to use and safe dimming solution for either standard or halogen bulb lighting circuit applications

The Dimmer Module provides easy control from either a 12V or 24V DC power source (min 9V max. 30V). It is controlled by a single push button operation and incorporates over voltage protection and in built thermal protection to guard against system overload. The unit also incorporates a gentle start up feature which protects the bulb from initial surges on start up ensuring longer bulb life.

- **Intelligent One Touch Simple Operation**
- **Simple Multi-plug Installation**
- **12V & 24V Dc Supply**
- **Unlimited Multiple Switches**
- **Use The Switch Of Your Choice**
(momentary normally open)
- **Soft Start Bulb Protection**
- **Inbuilt Noise Suppression**
(eliminates hi fi interference / humming)
- **Low Voltage Over Current Protection**
(thermal-overload isolation)
