

# HIDE YOUR AV EQUIPMENT AWAY WITH THE **EYE Q** INFRA-RED REPEATING SYSTEM

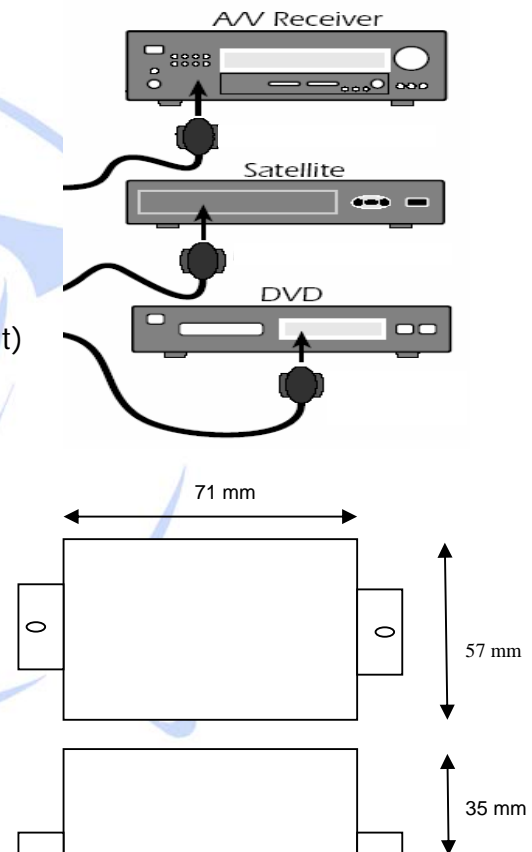

## *Control For Your AV Equipment*

Located discreetly in the room, the IR receiver responds to the IR command transmitted from your remote control handset. The signal is then carried via a small 3-conductor cable to your A/V equipment and instantly "repeated".

Each emitter contains a small infrared LED housed in a miniature, black, Injection moulded plastic shell. Each emitter sends IR control signals when activated by an IR controller.

- **Controls Multiple Devices**
- **Universal Compatibility With Most IR Controllers** (40Khz)
- **Simple Multi-plug Installation**
- **Plasma Friendly Panel Mount Receiver**
- **IR Transparent**  
(the IR signal can still directly control the equipment)
- **Highest Level Of Signal Transmission**  
(noise filter)
- **Discreet Low Profile Design**
- **12V DC Supply**
- **Kit Includes 1 x Receiver + 4 x Emitters**

**5 YEAR GUARANTEE**
